

Capabilities statement

Carrus Group is an operational efficiency company serving manufacturing clients throughout the United States.

Many factories reach their production capacity prematurely due to inefficient processes and layouts. Carrus Group analyzes facility layouts for optimal expansion size or relocation needs. We have successfully project managed the relocation of production facilities and production lines for our clients. We act as an Operations General Contractor and Project Manager, integrating production systems with minimal disruptions allowing our clients to focus on their core business and day to day operations.

At Carrus Group, we partner with our clients to improve the layout of production facilities, optimize production flow, eliminate waste, increase production quality and project manage special projects.

Special Projects Include

- Plant Expansions and Relocation
- Equipment Improvements
- Facility Utilization Analysis
- Production Line Optimization
- Automating Production Processes
- Increasing Throughput
- Detailed Plant Layouts
- Machinery / Equipment Upgrades
- Process Improvement

Before

After

4 Phases of a Project

- Phase 1 – Pre- Planning
 - Capture Production Current State
 - Identify Waste in Production
 - Preliminary Plant Layout
- Phase 2 – Build Up
 - New Plant Layout
 - Implement new equipment into layout and system.
 - Lean waste out of production processes
 - Liaison between GC and Client for infrastructure and equipment needs.
- Phase 3 – Project Management / Implementation / Installation
 - Project Management
 - Rigging and Moving Schedule
 - Commission and Run-off Equipment
- Phase 4 – Continuous Improvement / Monitoring and Control

Industry Experience

- New Construction
- Manufacturing
- Distribution
- Assembly / Fab
- RE-manufacturing
- Relocation / TI Build-out
- Expansions/Additions

“Let’s Get Stuff Done”
