CARRUS AT A GLANCE

Your operations should drive your profitability, not limit it. Whether it's relocating manufacturing operations, expanding facilities, or optimizing existing operations, Carrus Group brings the expertise and execution to manage your project at every phase so that your primary focus remains on your organization's success.

4 PHASES OF A PROJECT

PHASE 1 STUDY

- Capture current production state
- Identify inefficiencies in value stream
- Preliminary plant layout

PHASE 2 PLAN

- Final layout design
- Equipment sourcing and selection
- Lean out of production processes

PHASE 3 IMPLEMENT

- Project management and focused accountability
- Project timeline coordination and execution
- Commission and run-off equipment

PHASE 4 CLOSEOUT

- Finalize outstanding items
- After action review
- Project handoff

INDUSTRY EXPERIENCE AND SERVICE OFFERINGS

- Plant Expansion or Relocation Coordination
- Operations Analysis
- Process Automation
- Value Stream Mapping
- Production Line Optimization
- Throughput Escalation
- Detailed Plant Layouts
- Process Improvement
- Equipment Assessment
- Project Management
- New Building Design
- Facility Selection
- Facility Layout
- Assembly / Fabrication
- Re-manufacturing
- Relocation / TI Build-out
- Expansions / Additions
- Equipment Selection
- Operational Efficiency

THE CARRUS DIFFERENCE

Too many manufacturers hit an artificial ceiling due to inefficient processes and layouts. This is where Carrus Group thrives.

We promise to be the partner you can count on when growth demands more than your current facility can give, or operational changes are needed at major inflection points.

We will analyze your operations, design smarter layouts, and manage every step of expansion or relocation so you can stay focused on running your business.

When we work together, you can expect leaner production flow, less waste, higher quality output, and a facility built to scale.

We protect your momentum, and your success is our measure.
